

Programming Trailer Settings (Truck)

- 1) Download and Install the latest OZ-X Installer App.
- 2) Open the OZ-X Installer App, in the **Devices** section it will show a list of vehicles nearby. Press on the device (FLEET Number) which you wish to program.
Note: The Trucks Ignition needs to be on
- 3) Press **Setup**, then press **Device**.
- 4) Press **Trailers**.
- 5) Press **Number of Trailers**.
- 6) Select the **Maximum** Number of Trailers / Dollies you require the Truck to connect to. (Make sure Drop & Hook is ON for Auto Trailer detection and connection)
- 7) Press the **back** arrow to return to the **Device** screen.
- 8) Press the **back** arrow to return to the **Setup** screen then press **Devices**.
- 9) Press on the connected Device to disconnect.

OZ-X Installer

VIDEO INSTRUCTION

The Truck receiver has now been programmed to receive the number of Trailers you selected.

Note: The Incab Monitor is defaulted to display up to 6 Trailers. It will only display the maximum number of Trailers on the display as per the Truck Receiver settings. Example. If the Truck Receiver is set to 2 Trailers, it will only connect to and show 2 Trailers.

To check the monitor settings, you can connect to Device DRX110, go to Setup, Device and check Number of Trailers is set to 6.
